

RENAULT NISSAN MITSUBISHI

Senior Developer

Overall role: Senior Software Developer

Overall responsibility: Development of final Web, mobile & server software. Provide technical guidance to the team.

Overall competency: Experience in software engineering (more than 8 years in software development role)

Role

We are looking for a Senior developer on digital technology to join our rapidly growing team. As a developer on digital technology, you play a vital role in developing a wide range of our products. You are expected to apply guidance provided by Tech Leaders in technical subjects (Java, Web Services, REST, Databases, and development best practices). You have a solid experience in agile teams and processes. You have a solid experience with collaboration tools (JIRA / Confluence...). You are expected to coach junior developers and help them finding day to day solutions. You are expected to work with Tech Leaders and Scrum Masters to put in place first class technology solutions.

Key responsibilities

- Implement User Stories within software products
- Front-/back-end engineering of stable, smoothly functioning products
- Participate to discussions of technical solutions and product ideas in design reviews, pair programming, and code review
- Junior developers coaching (pair programming, code reviews, coding dojo...)

Competencies

- Proficiency in Java, Java-based back-end applications, REST API services, Hibernate, Spring and SpringBoot. Java eco-system tools and libraries.
- Strong knowledge in SQL, NoSQL
- Strong knowledge with Model View Controller (MVC) design patterns, Object-Oriented Programming (OOP) and development best practices
- Strong analytical skills. Able to switch between theoretical concepts and realizations
- Solid experience In Agile software (extremProgramming, SCRUM or Lean) and test-driven development. Pair programming experience appreciated
- Ideally experience in the start-up scene and/or with innovative tech firms.
- Degree in computer science, electrical engineering, or other relevant engineering
- Strong drive and motivation
